Comparative Vertebrate Anatomy BIOL 4300 Spring Semester, 2012 CRN - 21392 Instructor - Dr. J. Mitchell Lockhart Office

Cheating: Refer to the Student Code of Ethics in the Valdosta State University Student Handbook. A student caught cheating will be penalized ranging from receiving a zero for that assignment or test to failing the class.

Important Dates: Midterm Thursday, March 1; Final Exam Wednesday, May 2, 2:45a.m.-4:45 p.m.

DISSECTION ASSIGNMENT

You will work in groups of two, with the partner you have in lab, to prepare a powerpoint chronology of the dissections you are performing. This will stimulate you to do excellent, meticulous dissections in the laboratory. I want each group to take digital photographs of their dissections, import them into powerpoint, and label all parts that you are required to learn in the laboratory. When you import the photographs into powerpoint, make two slides of each photograph. Leave one blank and label the other. Label anatomical parts clearly within powerpoint with either NUMBERS or LETTERS. Then on the following powerpoint slide, provide a key for the previous photograph.

You are not required to do this for the lamprey, but I do want photographs of the mudpuppy, shark, and cat. Your laboratory guide gives you an EXCELLENT reference and should you come anywhere close to the quality found in the lab guide, you will do well on the project.

This project will be due on April 27 at noon. You will turn in a CD or jump drive copy of your project that I CAN OPEN on my computer.

^{*} The Instructor reserves the right to modify the above contents with proper notification.

Course Outcomes:

Course:

By the end of BIOL 4300, students who successfully complete the course should have:

- 1. Gained factual knowledge, to include anatomy and physiological terminology, methods, and principles, about Comparative Vertebrate Anatomy. (DO 2.3.5; VSUGEO 5)
- principles, about Comparative Vertebrate Anatomy. (DO 2,3,5; VSUGEO 5)

 2. Learned fundamental principles, generalizations or the parative Vertebrate
- Anatomy. (DO 2,3,5; VSUGEO 5)

 3. Learned to apply course material (to improve thinking, problem solving, and decisions) in Comparative Vertebrate Anatomy. (DO 2,3,5, VS 1000 5)
- 4. Developed specific skills, competencies and points of view needed by professional in the fields most (cies&MCID 1m)[TJ.3(ate)-5(A)1 TJ6(at.ETBT/F4 9.96 Tf)3()-2(4.02 3lls)]&essmparative Vertebrate Anf

to enable them to become informed and responsible citizens. They will understand the connections between the individual and society and the roles of social institutions. They will understand the structure and operational principles of the United States government and economic system. They will understand United States history and both the historical and present role of the United States in the world.

- 2. Students will demonstrate cross-cultural perspectives and knowledge of other societies. They will possess sufficient knowledge of various aspects of another culture, including the language, social and religious customs, aesthetic expression, geography, and intellectual and political history, to enable them to interact with individuals within that society from an informed perspective. They will possess an international viewpoint that will allow them to examine critically the culture of their own nation and to participate in global society.
- 3. Students will use computer and information technology when appropriate. They will demonstrate knowledge of computer concepts and terminology. They will possess basic working knowledge of a computer operating system. They will be able to use at least two software tools, such as word processors, spreadsheets, database management systems, or statistical packages. They will be able to find information using computer searching tools.
- 4. <u>Students will express themselves clearly, logically, and precisely in writing and in speaking, and they will demonstrate competence in reading and listening.</u> They will display the ability to write coherently in standard English; to speak well; to read, to understand, and to interpret the content of written materials in various disciplines; and to listen effectively and to understand different modes of communication.

5.

Tentative Lecture Outline - This is the order in which we will cover topics.

TOPIC

Nature of Vertebrate Morphology/Introduction					
Origin and Classification of Vertebrates/Early Chordates					
Fishes					
Tetrapods					
Development/Embryology					
Integument and Derivatives					
Coelom and Mesenteries					
Head Skeleton					
Teeth					
Axial Skeleton					
Appendicular Skeleton					
Muscular System					
Digestive System					
Respiratory System					
Circulatory System					
Nervous System					
Reproductive System					
Excretory System					
Endocrine System					
Lecture Exams:					

Lecture Exams:

- 1 February 9
- 2 March 22
- 3 April 26

Final Exam
