

Thank you for your interest in Secondary T&I/HSTE Certification for the state of Georgia. The basic requirements for a Technical Specialist certification in a T&I or HSTE field are as follows:

- a. Documented work experience in the respective field.
- b. Professional licensure in those occupations for which the Professional Standards Commission has identified an accrediting agency.
- c. Completion of specific coursework relating to educational foundations, internship, education of exceptional children , integration of technology , and
